

## Graduate Employment Outcomes

Sourced from the 2022 Graduate Outcome Survey of the Class of 2019-20

The Government of Alberta administers a Graduate Outcome Survey biennially. Of the 1,937 graduates of the class of 2019-20, 759 graduates completed the survey, resulting in a 39.2% response rate.

At the time of the survey, which was two years post-graduation, 95.0% of the graduates were employed. This is comparable to the 93.3% of graduates of all Alberta post-secondary institutions.

The majority of Athabasca University graduates indicated that their main job was very related to the program from which they graduated (61.3%), including the subject area knowledge they had acquired (60.4%) and the general skills and abilities they had acquired (69.0%).
